Dynamic Games and Applications

Editor-in-Chief: G. Zaccour

- ▶ The first journal dedicated to the development and application of dynamic games
- ▶ Promotes cross-fertilization among interdisciplinary fields
- ▶ Coverage is on applications to economics and management science, biology and ecology, computer science and networked-based areas including telecommunications, transportation, and energy
- ▶ Free app available on iTunes and Google Play Store

Dynamic Games and Applications is devoted to the development of all classes of dynamic games, namely, differential games, discrete-time dynamic games, evolutionary games, repeated and stochastic games, and their applications in all fields, including:

- * biology
- * computer science
- * ecology
- * economics
- * engineering
- * management science
- * operations research
- * political science
- * psychology

DGAA seeks original research that makes significant methodological, conceptual, algorithmic, or empirical contributions to various disciplines. **DGAA** also considers work in static game theory and dynamic optimization provided that authors establish a clear, potential link to dynamic games. **DGAA** publishes regular papers, technical notes, survey articles and case studies.

Impact Factor: 1.213 (2018), Journal Citation Reports®
