

Exploring Urban Change in South Asia

Series Ed.: M.-H. Zerah

The series incorporates work on urbanisation and urbanism in South Asia from diverse perspectives, including, but not being limited to, sociology, anthropology, geography, social policy, urban planning and management, economics, politics and culture studies. It publishes original, peer-reviewed work covering both macro issues such as larger urbanisation processes, and economic shifts and qualitative research work focused on micro studies (either comparative or ethnographic based). Both individual authored and edited books are considered within the series with the possibility of identifying emerging topics for handbooks.
