

Orthopaedic Study Guide Series

Series Editors: N.K. Paschos, G. Bentley

Orthopaedics has many different specialisations such as trauma, spine, sports medicine, arthroplasty, oncology, paediatric orthopaedics, hand surgery and microsurgery to name just a few. This means that residents preparing for their exams have a broad field to study and to remember. In addition, orthopaedics is a surgical specialty, thus knowledge of orthopaedic techniques is necessary and is tested during these exams. To cover all these fields and aspects of orthopaedics, this book series has volumes dedicated to each study area and provides a guide for all orthopaedic residents in preparation for residency and fellowship exams.
