Human-centric Computing and Information Sciences

Editor-in-Chief: J.H. Park

Managing Editors: Y. Sung

Managing Editor: N.N. Xiong

- ▶ **Presents current research in the expanding field of HCIS**
- ▶ **Topics include Social Computing, Gaming and Semantic Systems, Computer-assisted Learning, Mobile Systems and more**
- ▶ **Covers models, services, and novel applications**

Human-centric Computing and Information Sciences is a peer-reviewed open access journal published under the brand SpringerOpen. It publishes high quality papers covering theory and practical applications for HCIS. Coverage includes such topics as

Human-computer interaction and User-centered Design; Social computing and social intelligence; Ubiquitous computing and mobile systems; Gaming and Semantic Systems; Computer-assisted Learning and Cognition; Privacy, Security and trust management; and Applications with Image Processing, Computer Vision Systems, Language and Search Engine Design.

The journal brings together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of Human-centric Computing technology and Information Sciences, and to disseminate the most innovative research and development of all aspects of human-centric computing.

Giving authors in their area of expertise
the opportunity to publish open access

- ▶ High visibility thanks to unrestricted online access
- ▶ Rigorous peer-review and high-quality author services
- ▶ Creative Commons licensed – authors retain copyright
- ▶ Citation tracking and inclusion in bibliographic databases
- ▶ Easy compliance with open access mandates
