Machine Vision and Applications

Editor-in-Chief: R. Sukthankar

- ▶ Sponsored by the International Association for Pattern Recognition
- ▶ Publishes high-quality technical contributions in machine vision research and development
- ▶ Features coverage of all applications and engineering aspects of image-related computing, including scientific, commercial, industrial, military, and biomedical applications of machine vision
- ▶ Places particular emphasis on the engineering and technology aspects of image processing and computer vision
- ▶ 96% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Please note, we are currently updating the 2018 Journal Metrics.

Sponsored by the International Association for Pattern Recognition, this journal publishes high-quality, technical contributions in machine vision research and development. Machine Vision and Applications features coverage of all applications and engineering aspects of image-related computing, including original contributions dealing with scientific, commercial, industrial, military, and biomedical applications of machine vision.

The journal places particular emphasis on the engineering and technology aspects of image processing and computer vision. It includes coverage of the following aspects of machine vision applications: algorithms, architectures, VLSI implementations, AI techniques and expert systems for machine vision, front-END sensing, multidimensional and multisensor machine vision, real-time techniques, image databases, virtual reality and visualization.

Impact Factor: 1.788 (2018), Journal Citation Reports®
