Studies in Economic Transition

Series Editors: J. Hölscher, H. Tomann

This series brings together theoretical and empirical studies on the transformation of economic systems and their economic development. The transition from planned to market economies is one of the main areas of applied theory because in this field the most dramatic examples of change and economic dynamics can be found. It is aimed to contribute to the understanding of specific major economic changes as well as to advance the theory of economic development. The implications of economic policy will be a major point of focus.
