## Telecommunications and Information Technology

Series Ed.: A. Paradisi

Telecommunications and Information Technology is an official book series of the Brazilian Center for Research and Development (CPQD). It publishes scientific monographs on a varied array of topics or themes in telecommunications and information technology, mainly on topics under research and development at CPQD: optical and wireless communications, sensors, cognitive and advanced computing, information security, embedded systems, smart grid, energy storage, and operation support systems. The topics are in line with current modern-day trends: broadband, smart grid, future banking, smart cities, defense and security.
