## Data Analytics

Series Editors: L. Cao, P.S. Yu

### Aims and Goals:

Building and promoting the field of data science and analytics in terms of publishing work on theoretical foundations, algorithms and models, evaluation and experiments, applications and systems, case studies, and applied analytics in specific domains or on specific issues.

### Specific Topics:

This series encourages proposals on cutting-edge science, technology and best practices in the following topics (but not limited to):

- Data analytics, data science, knowledge discovery, machine learning, big data, statistical and mathematical methods for data and applied analytics,
- New scientific findings and progress ranging from data capture, creation, storage, search, sharing, analysis, and visualization,
- Integration methods, best practices and typical examples across heterogeneous, interdependent complex resources and modalities for real-time decision-making, collaboration, and value creation.
