## Fascinating Life Sciences

This interdisciplinary series brings together the most essential and captivating topics in the life sciences. They range from the plant sciences to zoology, from the microbiome to macrobiome, and from basic biology to biotechnology. The series not only highlights fascinating research; it also discusses major challenges associated with the life sciences and related disciplines and outlines future research directions. Individual volumes provide in-depth information, are richly illustrated with photographs, illustrations, and maps, and feature suggestions for further reading or glossaries where appropriate.

Interested researchers in all areas of the life sciences, as well as biology enthusiasts, will find the series' interdisciplinary focus and highly readable volumes especially appealing.

### Recently published:

G. Majdic

#### Soul Mate Biology

Science of attachment and love

B.K. Lim, M.B. Fenton, R.M. Brigham, S. Mistry, A. Kurta, E.H. Gillam, A. Russell, J. Ortega (Eds.)

#### 50 Years of Bat Research

Foundations and New Frontiers

C. Grüter

#### Stingless Bees

Their Behaviour, Ecology and Evolution

### Upcoming Volumes:

F. Geiser

#### Ecological Physiology of Daily Torpor and Hibernation
