Encyclopedia of Sustainability Science and Technology Series

Editor-in-chief: R.A. Meyers

The Encyclopedia of Sustainability Science and Technology series (ESST) addresses the grand challenge for science and engineering today. It provides unprecedented, peer-reviewed coverage in more than 600 separate articles comprising 20 topical volumes, incorporating many updates from the first edition as well as new articles. ESST establishes a foundation for the many sustainability and policy evaluations being performed in institutions worldwide.

An indispensable resource for scientists and engineers in developing new technologies and for applying existing technologies to sustainability, the Encyclopedia of Sustainability Science and Technology series is presented at the university and professional level needed for scientists, engineers, and their students to support real progress in sustainability science and technology.

Although the emphasis is on science and technology rather than policy, the Encyclopedia of Sustainability Science and Technology series is also a comprehensive and authoritative resource for policy makers who want to understand the scope of research and development and how these bottom-up innovations map on to the sustainability challenge.

Recently published:

M.E. Goodsite, M.S. Johnson, O. Hertel (Eds.)

Air Pollution Sources, Statistics and Health Effects

V. Loftness (Ed.)

Sustainable Built Environments

R. Malhotra (Ed.)

Fossil Energy

Upcoming Volumes:

A. Elgowainy (Ed.)

Electric, Hybrid, and Fuel Cell Vehicles

S. Alexopoulos, S. Kalogirou (Eds.)

Solar Thermal Energy
