Reproductive Medicine for Clinicians

Series Editors: J.G. Schenker, J.J. Sciarra, L. Mettler, A.R. Genazzani, M.H. Birkhäuser

This series will focus on and presents developments in knowledge and practice within all aspects of reproductive medicine. It will help to cover the important gap between the new possibilities offered by the most recent investigations and technical developments and the application in clinical practice.

The series will be a useful tool for professionals and practitioners in the fields of Gynecology, Obstetrics, and Human Reproduction. Trainees interested in the most complete information on the developments of reproductive medicine will benefit as well.
