

Perspectives in Nursing Management and Care for Older Adults

Series Editors: J. Santy-Tomlinson, P. Falaschi, K. Hertz

The aim of this book series is to provide a comprehensive guide to nursing management and care for older adults, addressing specific problems in nursing and allied health professions. It provides a unique resource for nurses, enabling them to provide high-quality care for older adults in all care settings. The respective volumes are designed to provide practitioners with highly accessible information on evidence-based management and care for older adults, with a focus on practical guidance and advice.

Though demographic trends in developed countries are sometimes assumed to be limited to said countries, it is clear that similar issues are now affecting rapidly developing countries in Asia and South America. As such, the series will not only benefit nurses working in Europe, North America, Australasia and many developed countries, but also elsewhere. Offering seminal texts for nurses working with older adults in both inpatient and outpatient settings, it will especially

support them during the first five years after nurse registration, as they move towards specialist and advanced practice. The series will also be of value to student nurses, employing a highly accessible style suitable for a broader readership.
