Algorithms for Intelligent Systems

Series Editors: J.C. Bansal, K. Deep, A.K. Nagar

This book series publishes research on the analysis and development of algorithms for intelligent systems with their applications to various real world problems. It covers research related to autonomous agents, multi-agent systems, behavioral modeling, reinforcement learning, game theory, mechanism design, machine learning, meta-heuristic search, optimization, planning and scheduling, artificial neural networks, evolutionary computation, swarm intelligence and other algorithms for intelligent systems.

The book series includes recent advancements, modification and applications of the artificial neural networks, evolutionary computation, swarm intelligence, artificial immune systems, fuzzy system, autonomous and multi agent systems, machine learning and other intelligent systems related areas. The material will be beneficial for the graduate students, post-graduate students as well as the researchers who want a broader view of advances in algorithms for intelligent systems. The contents will also be useful to the researchers from other fields who have no knowledge of the power of intelligent systems, e.g. the researchers in the field of bioinformatics, biochemists, mechanical and chemical engineers, economists, musicians and medical practitioners.

The series publishes monographs, edited volumes, advanced textbooks and selected proceedings.

Recently published:

S. Saremi, S. Mirjalili

Optimisation Algorithms for Hand Posture Estimation

M.S. Uddin, J.C. Bansal (Eds.)

Proceedings of International Joint Conference on Computational Intelligence

IJCCI 2018

Upcoming Volumes:

S. Mirjalili, H. Faris, I. Aljarah (Eds.)

Evolutionary Machine Learning Techniques

Algorithms and Applications

G.S. Tomar, A. Bagwari

Fundamentals of Electronic Devices and Circuits

H. Sharma, K. Govindan, R.C. Poonia, S. Kumar, W.M. El-Medany (Eds.)

Advances in Computing and Intelligent Systems

Proceedings of ICACM 2019
