Emerging Contaminants and Associated Treatment Technologies

Series Editors: M.Z. Hashmi, V. Strezov

Emerging Contaminants and Associated Treatment Technologies focuses on contaminant matrices (air, land, water, soil, sediment), the nature of pollutants (emerging, well-known, persistent, e-waste, nanomaterials, etc.), health effects (e.g., toxicology, occupational health, infectious diseases, cancer), treatment technologies (bioremediation, sustainable waste management, low cost technologies), and issues related to economic development and policy. The book series includes current, comprehensive texts on critical national and regional environmental issues of emerging contaminants useful to scientists in academia, industry, planners, policy makers and governments from diverse disciplines. The knowledge captured in this series will assist in understanding, maintaining and improving the biosphere in which we live. The scope of the series includes monographs, professional books and graduate textbooks, edited volumes and books devoted to supporting education on environmental pollution at the graduate and post-graduate levels.

Recently published:

M.S.H. Akash, K. Rehman (Eds.)

Environmental Contaminants and Neurological Disorders

B. Balabanova, T. Stafilov (Eds.)

Contaminant Levels and Ecological Effects

Understanding and Predicting with Chemometric Methods

M.S.H. Akash, K. Rehman, M.Z. Hashmi (Eds.)

Endocrine Disrupting Chemicals-induced Metabolic Disorders and Treatment Strategies

Upcoming Volumes:

M. Vasanthi, V. Sivasankar, T.G. Sunitha (Eds.)

Organic Pollutants

Toxicity and Solutions

M.Z. Hashmi (Ed.)

Microplastic Pollution

Environmental Occurrence and Treatment Technologies
