## Behavioral Ecology and Sociobiology

Editors-in-Chief: T.C.M. Bakker; J.F.A. Traniello

- ▶ Presents quantitative empirical and theoretical studies in the analysis of animal behavior at the level of the individual, group, population, community, and species
- ▶ Offers reviews, original contributions and commentaries
- ▶ 90% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Behavioral Ecology and Sociobiology publishes reviews, original contributions and commentaries dealing with quantitative empirical and theoretical studies in the analysis of animal behavior at the level of the individual, group, population, community, and species. The section "Methods" considers submissions concerning statistical procedures and their problems, as well as with problems related to measurement techniques.

Special emphasis is placed on ultimate functions and evolution of ecological adaptations of behavior, in addition to mechanistic studies of proximate cause.

Among aspects of particular interest are intraspecific behavioral interactions, with special focus on social behavior including altruism, cooperation and parental care; pre- and postzygotic sexual selection; kin recognition and kin selection, group structure, social networks; interspecific behavioral interactions including competition, resource partitioning, speciation, foraging, mutualism, predator-prey interactions and parasitism; signalling, behavioral ecophysiology, information processing and neuroecology; behavioral genetics; sociogenomics, behavioral plasticity and behavioral syndromes; dispersal and orientation in space and time; and relevant evolutionary and functional theory.

The Chief Editors are Theo C. M. Bakker, Bonn, Germany (vertebrates) and James F. A. Traniello, Boston, U.S.A. (invertebrates).

### Continuous Article Publishing

As of 2017, *Behavioral Ecology and Sociobiology* has changed its publication structure from paginated issues to a consecutive publishing model: Continuous Article Publishing.

This means that papers are published in a volume/issue immediately after acceptance.

Impact Factor: 2.473 (2017), Journal Citation Reports®
