Acta Neurochirurgica Supplement

Series Ed.: H.-J. Steiger

ACTA NEUROCHIRURGICA's Supplement Volumes provide a unique opportunity to publish the content of special meetings in the form of a Proceedings Volume. Proceedings of international meetings concerning a special topic of interest to a large group of the neuroscience community are suitable for publication in ACTA NEUROCHIRURGICA. Links to ACTA NEUROCHIRURGICA's distribution network guarantee wide dissemination at a comparably low cost. The individual volumes should comprise between 120 and max. 250 printed pages, corresponding to 20-50 papers. It is recommended that you get in contact with us as early as possible during the preparatory stage of a meeting. Please supply a preliminary program for the planned meeting. The papers of the volumes represent original publications. They pass a peer review process and are listed in PubMed and other scientific databases. Publication can be effected within 6 months. Hans-Jakob Steiger is the Editor of ACTA NEUROCHIRURGICA's Supplement Volumes. Springer Verlag International is responsible for the technical aspects and calculation of the costs. If you decide to publish your proceedings in the Supplements of ACTA NEUROCHIRURGICA, you can expect the following: • An editing process with editors both from the neurosurgical community and professional language editing. After your book is accepted, you will be assigned a developmental editor who will work with you as well as with the entire editing group to bring your book to the highest quality possible. • Effective text and illustration layout for your book. • Worldwide distribution through Springer-Verlag International's distribution channels.
