Agricultural Research

Editor-in-Chief: A. Varma

► **The goal of the journal is to publish articles on new and emerging fields and concepts for providing future directions to promote agricultural research globally. It is a unique journal covering all the disciplines of crop sciences, animal sciences, fishery sciences, forestry sciences and natural resources management sciences, to stimulate interest in inter-disciplinary research. The journal will catalyze policy development on issues impacting rational agricultural growth and development globally.**

The National Academy of Agricultural Sciences (NAAS), established in 1990, is among the youngest of the Science Academies in India. It owes its origin to the vision of the late Dr. B. P. Pal, FRS. The Academy focuses on the broad field of agricultural sciences including crop husbandry, animal husbandry, fisheries, agro-forestry and interface between agriculture and agro-industry. The Academy's role is to provide a forum to Agricultural Scientists to deliberate on important issues of agricultural research, education and extension and present views of the scientific community as policy inputs to planners, decision/opinion makers at various levels. To achieve this, the Academy organizes and supports national and international congresses, conferences, seminars, symposia, workshops and brainstorming sessions on critical issues in the field of agricultural sciences. The Academy accords recognition to scientists at various levels, and encourages cutting edge research in different fields of agricultural sciences.
