## Journal of The Institution of Engineers (India): Series D

Metallurgical & Materials and Mining Engineering

Editor-in-Chief: N.R. Bandyopadhyay

- ▶ **This Journal serves the national and international engineering community through dissemination of scientific knowledge on practical engineering and design methodologies pertaining to metallurgical & materials and mining engineering. Original unpublished manuscripts are solicited in all these areas including but not limited to material science, composite structures, mine safety, mining machineries etc. related researches. It covers all possible areas of latest research and developmental works in the field of metal matrix, nano materials, bio material, networking technologies in mines, wireless communication for mining areas, etc. so that the researchers, scientists or professionals can be easily motivate themselves to pursue the work.**

The Institution of Engineers (India) is the largest professional body of Engineers established in 1920 and was granted the Royal Charter in 1935. IEI encompasses 15 Engineering Disciplines and one Interdisciplinary Division. It is worthy to mention that the Institution had accredited the course curriculum of IIT Kharagpur, the first IIT established in India. It also has the distinction of producing the maximum number of engineers in the core engineering disciplines, thus augmenting the nation building efforts. The Institution has a national presence of over 100 State and Local Centres in India and further extended its services to the International Community with five Overseas Chapters around the world. It has the full Membership of World Federation of Engineering Organization, Federation of Engineering Institution of South and Central Asia, Federation of Engineering Institution of South and the Pacific, Commonwealth Engineers Council, Federation of International du Beton and World Mining Congress. In a landmark achievement, the Institution obtained full Membership of the Engineers Mobility Forum for India at the Biennial International Engineers Meeting held at Kyoto, Japan in the year 2009. To promote the study of Engineering with a view to disseminate the information for facilitating the scientific and economic development of Engineering in India, The Institution of Engineers (India) is organizing Lectures, Seminars, Workshops, Indian Engineering Congress, International Conferences etc. at various parts of the country. Apart from organizing the technical activities in various engineering disciplines, the Institution has been disseminating the quality information regarding its activities and latest developments in the field of Engineering and Technology through IEI News and Technorama.
