Materials for Renewable and Sustainable Energy

Editors-in-Chief: E. Traversa

- The world’s foremost interdisciplinary scholarly Open Access journal on all aspects of materials for the deployment of renewable and sustainable energy technologies
- No article processing charges
- The journal awards $5000 to the best paper of the year

Please note, we are currently updating the 2018 Journal Metrics.

MATERIALS FOR RENEWABLE AND SUSTAINABLE ENERGY is a single-blind peer-reviewed open access journal published under the SpringerOpen brand.

Energy is the single most valuable resource for human activity and the basis for all human progress. Materials play a key role in enabling technologies that can offer promising solutions to achieve renewable and sustainable energy pathways for the future.

MATERIALS FOR RENEWABLE AND SUSTAINABLE ENERGY has been established as an Open Access journal to be the world's foremost interdisciplinary forum for publication of research on all aspects of the study of materials for the deployment of renewable and sustainable energy technologies. The journal covers experimental and theoretical aspects of materials and prototype devices for sustainable energy conversion, storage, and saving, together with materials needed for renewable fuel production.

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
