American Journal of Cardiovascular Drugs

Editor: A. Prakash

Promoting rational therapy within the discipline of cardiology, the *American Journal of Cardiovascular Drugs* covers all aspects of the treatment of cardiovascular disorders, particularly the place in therapy of newer and established agents.

Via a program of reviews and original clinical research articles, the journal addresses major issues relating to treatment of these disorders, including the pharmacology, efficacy and adverse effects of the major classes of drugs; information on newly developed drugs and drug classes; the therapeutic implications of latest research into the aetiology of cardiovascular disorders; and the practical management of specific clinical situations.

The *American Journal of Cardiovascular Drugs* offers a range of additional enhanced features designed to increase the visibility, readership and educational value of the journal's content. Each article is accompanied by a Key Points summary, giving a time-efficient overview of the content to a wide readership. Articles may be accompanied by plain language summaries to assist readers in understanding important medical advances. The journal also provides the option to include various other types of enhanced features including slide sets, videos and animations. All enhanced features are peer reviewed to the same high standard as the article itself. Peer review is conducted using Editorial Manager®, supported by a database of international experts. This database is shared with other Adis journals.

Impact Factor: 2.578 (2018), Journal Citation Reports®
