## Clinical Pharmacokinetics

Editor: A. Prakash

Associate Editor: A. van Rensburg

*Clinical Pharmacokinetics* is the major review journal in the area of clinical pharmacokinetics, the study of drug disposition in the human body, which is an integral part of drug development and rational pharmacotherapy.

The *Journal* promotes the continuing development of clinical pharmacokinetics and pharmacodynamics, for the improvement of drug therapy and to further postgraduate education in clinical pharmacology and therapeutics, by publishing critical and comprehensive review articles and clinically focussed original research articles.

*Clinical Pharmacokinetics* offers a range of additional enhanced features designed to increase the visibility, readership and educational value of the journal's content. Each article is accompanied by a Key Points summary, giving a time-efficient overview of the content to a wide readership. Articles may be accompanied by plain language summaries to assist readers in understanding important medical advances. The journal also provides the option to include various other types of enhanced features including slide sets, videos and animations. All enhanced features are peer reviewed to the same high standard as the article itself. Peer review is conducted using Editorial Manager®, supported by a database of international experts. This database is shared with other Adis journals.

### Announcement

*General Call for Papers:* European Journal of Drug Metabolism and Pharmacokinetics invites submission of high-quality Original Research, Practical Application, Current Opinion and Review Articles on the topics of preclinical and clinical pharmacokinetics and pharmacodynamics. For more information about the journal and online submission process visit: <https://www.springer.com/13318>

Impact Factor: 4.464 (2017), Journal Citation Reports®
