Sports Medicine

Editors: R. Olney; S. McMillan

Sports Medicine bridges the gap between science and practice in the promotion of exercise and health, and in the scientific assessment, study and understanding of sports performance. Regular features include: sports injury prevention and treatment; exercise for health; drugs in sport and recommendations for training and nutrition.

Designed as a superb reference source for physicians, sports medicine specialists, physiotherapists, exercise physiologists, team doctors and trainers alike, Sports Medicine focuses on definitive and comprehensive review articles that interpret and evaluate the current literature to provide the rationale for, and application of, research findings.

Sports Medicine also welcomes the submission of high-quality original research in the above fields.

Sports Medicine offers a range of additional enhanced features designed to increase the visibility, readership and educational value of the journal’s content. Each article is accompanied by a Key Points summary, giving a time-efficient overview of the content to a wide readership. Articles may be accompanied by plain language summaries to assist readers in understanding important medical advances. The journal also provides the option to include various other types of enhanced features including slide sets, videos and animations. All enhanced features are peer reviewed to the same high standard as the article itself. Peer review is conducted using Editorial Manager®, supported by a database of international experts. This database is shared with the Adis journals.

Impact Factor: 7.074 (2017), Journal Citation Reports®
