International Journal of Applied and Computational Mathematics

Editor-in-Chief: S. Saha Ray

The objective of the journal is to publish original research in applied and computational mathematics, with interfaces in physics, engineering, chemistry, biology, operations research, statistics, finance and economics. The primary aim of this journal is the dissemination of important mathematical work which has relevance to engineering. It will also attract special attention to a wide number of researchers for theoretical mathematical science and mathematical computing problems. It will cover all primary areas such as:

- Applied mathematics
- Mathematical physics
- Numerical methods
- Mathematical modelling
- Fluid dynamics
- Nonlinear science
- Complexity

This journal will have a high-quality standard of a scientific international journal and will consist of the high level of scientific contributions in terms of originality, novelty, depth and relevance. The journal is intended to provide a forum for the expression of new findings and ideas as well as to disseminate knowledge through the exposition of interdisciplinary subjects.
