## Nano-Micro Letters

Editor-in-Chief: Y. Zhang

- ▶ Reports on nano- or microscale science, technology, engineering and application in physics, chemistry, biology, material, pharmacy and their expanding interfaces with at least one dimension ranging from a few sub-nanometers to a few hundreds of micrometers, especially, emphasize the bottom-up approach in the length scale from nano to micro
- ▶ Presents an attractive and comprehensive reviews, original articles on cutting-edge research and brief communications
- ▶ Offers rapid peer-reviewed process and open-access publication

*Nano-Micro Letters* is a peer-reviewed, international, interdisciplinary and open-access journal published under the SpringerOpen brand that focus on science, experiments, engineering, technologies and applications of nano- or microscale structure and system in physics, chemistry, biology, material science, pharmacy and their expanding interfaces with at least one dimension ranging from a few sub-nanometers to a few hundreds of micrometers. Especially, emphasize the bottom-up approach in the length scale from nano to micro since the key for nanotechnology to reach industrial applications is to assemble, to modify, and to control nanostructure in micro scale. The aim is to provide a publishing platform crossing the boundaries, from nano to micro, and from science to technologies.

Impact Factor: 7.381 (2017), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

- ▶ High visibility thanks to unrestricted online access
- ▶ Rigorous peer-review and high-quality author services
- ▶ Creative Commons licensed – authors retain copyright
- ▶ Citation tracking and inclusion in bibliographic databases
- ▶ Easy compliance with open access mandates
