## Polytechnica

Innovative Engineering for Global Challenges

Editor-in-Chief: E.C. Nelli Silva

- ▶ Presents research in which engineering intersects with communications, the human sciences, natural sciences, health studies, and more
- ▶ Each issue focuses on a problem of global impact, applying interdisciplinary perspectives and emerging technologies
- ▶ Benefits students, researchers, practitioners, policy-makers, and others committed to the advancement of engineering

*Polytechnica* accepts authoritative research manuscripts that address current challenges and new trends in Engineering, and which combine problem analysis with state-of-the-art technological and innovative solutions to address society's problems. Engineering topics can be approached from various points of view: historical, systemic or problem-based ones, covering new and emerging technologies and new formal developments.

*Polytechnica* encourages multi- and interdisciplinary studies that help to benefit researchers by conjoining Engineering with other fields, such as Communications, the Human Sciences, Natural Sciences, and Health Studies. Therefore, *Polytechnica* is committed to exploring paradigm shifts that, due to the broader perspective, could potentially change the future of technology and humankind.

Each issue of *Polytechnica* focuses on a specific problem of global impact, from an interdisciplinary perspective and while applying emerging technologies.

*Polytechnica* promotes a new perspective on research, committed to the development of new top-down engineering approaches, i.e., those focusing on society-wide problems rather than on consolidated engineering areas alone. As such, *Polytechnica* offers a fresh and valuable source of information for students, researchers, practitioners, policy-makers, and all those committed to the advancement of engineering.
