## China Foundry

Editor-in-Chief: Y. Lou

Executive Editor-in-Chief: C. Ge

- ▶ Covers all casting technologies and includes novel and net shape casting technologies; casting alloy design and modification; control of nucleation, solidification and microstructure & mechanical properties; computer aided design; rapid prototyping; mouldmaking, mould materials and binders; mould and gating design; melting and liquid metal treatment and transport; modeling and simulation of metal flow and solidification; post-casting treatments; quality control and non-destructive testing; process automation and robotics; and safety and environmental issues
- ▶ Presents advanced scientific and technical achievements, applied technology, successful experiences in production, recent development and industry information in foundry field
- ▶ Offers rapid review and publication of articles

China Foundry, published bimonthly to a worldwide readership, mainly reports on advanced scientific and technical achievements, applied technology, production successes, management and leadership, recent developments and industry information in the foundry field. Coverage encompasses all casting technologies and includes, but is not limited to, novel and net shape casting technologies; casting alloy design and modification; control of nucleation, solidification and microstructure & mechanical properties; computer aided design; rapid prototyping; mold making, mold materials and binders; mold and gating design; melting and liquid-metal treatment and transport; modeling and simulation of metal flow and solidification; post-casting treatments; quality control and non-destructive testing; process automation and robotics; and safety and environmental issues.

At present, distribution is to 50 countries and regions, and it is indexed and abstracted by: Science Citation Index-Expanded#since August 2007#, EBSCO, Chemical Abstracts (CA), Cambridge Science Abstracts (CSA), Abstract Journal (AJ) and Elsevier's largest abstract and citation database – Scopus, CNKI and Wanfang Data, etc.

Impact Factor: 0.733 (2018), Journal Citation Reports®
