Oral Cancer
Editor-in-Chief: M.A. Kuriakose

- Publishes high-quality research and clinical studies in oral oncology and related fields
- Promotes a multidisciplinary approach
- Edited by leading international experts

Oral Cancer is a multidisciplinary, international journal publishing high-quality research and clinical studies in oral oncology and related fields. This includes management of both benign and malignant lesions of head and neck region and reconstruction and rehabilitation of maxillofacial defects. The journal promotes a multidisciplinary approach with dedicated sections on pathology, epidemiology, prevention, surgery, reconstruction and rehabilitation, medical intervention and pharmacology, radiation oncology, supportive care, and outcome research. The journal targets researchers and clinicians in the fields of head and neck oncology, oral and maxillofacial surgery, otolaryngology-head and neck surgery, oral oncology, plastic surgery, oral medicine, and oral pathology. Accepted article types are original research, clinical studies, reviews, and short comments.
