## Planta

An International Journal of Plant Biology

Editors-in-Chief: A. Melis; D. Bartels

- **Planta is offering its authors free use of color!**
- **Areas of concentration include molecular and cell biology, structural biology, biochemistry, metabolism, growth, development and morphogenesis, ecological and environmental physiology, biotechnology, and plant-microorganism interactions**

### Continuous Article Publishing

As of 2020, *Planta* will change its publication structure from paginated issues to a consecutive publishing model: Continuous Article Publishing.

This means that papers are published in a volume/issue immediately after acceptance. As a further aspect of the new system, articles are no longer paginated sequentially by issue. Therefore, every article starts with page number 1. Page numbers are not used for article citation but every article has a citation ID number, called the *ArticleCitationID*. The ArticleCitationID is replacing the page numbers in the citation line.

Example: *Planta* (2020) 251: 123

This method of citation is accepted by the Web of Science/Journal Citation Reports (ISI).

As a result, all articles will have their full and final citation information available as soon as the production process is complete. This change will not affect the production time from acceptance to online publication of an article, but since the articles will be published online immediately in their final form, the overall publication time for articles will become shorter.

*Planta* publishes timely and substantial articles on all aspects of plant biology.

We welcome original research papers on any plant species. Areas of interest include biochemistry, bioenergy, biotechnology, cell biology, development, ecological and environmental physiology, growth, metabolism, morphogenesis, molecular biology, new methods, physiology, plant-microbe interactions, structural biology, and systems biology.

Impact Factor: 3.060 (2018), Journal Citation Reports®
