## International Series of Numerical Mathematics

Series Editors: M. Hintermüller, G. Leugering  
K.-H. Hoffmann (Ed.)

The *International Series of Numerical Mathematics* is open to all aspects of numerical mathematics, with topics of particular interest including free boundary value problems for differential equations, phase transitions, problems of optimal control and optimization, other nonlinear phenomena in analysis, nonlinear partial differential equations, efficient solution methods, bifurcation problems, and approximation theory. When possible, the topic of each volume is discussed from three different angles, namely those of mathematical modeling, mathematical analysis, and numerical case studies.

All manuscripts are peer-reviewed to meet the highest standards of scientific literature. Interested authors may submit proposals by email to the series editors or to the relevant Birkhäuser editor listed under "Contacts."

Series Editors: Michael Hintermüller, Weierstrass Institute for Applied Analysis and Stochastics, Berlin, Germany Günter Leugering, Universität Erlangen-Nürnberg, Germany

Associate Editors: Zhiming Chen, Chinese Academy of Sciences, Beijing, China Ronald H. W. Hoppe, University of Houston, USA Nobuyuki Kenmochi, Bukkyo University, Japan Victor Starovoitov, Lavrentyev Institute of Hydrodynamics, Novosibirsk, Russia

Honorary Series Editor: Karl-Heinz Hoffmann, Technische Universität München, Germany
