International Journal of Biometeorology

Editor-in-Chief: S.C. Sheridan

- Studies interactions between living organisms and factors of the natural and artificial physical environment
- Embraces basic and applied research and practical aspects such as living conditions, health and disease
- Published for the International Society of Biometeorology
- Editor-in-Chief: Scott C. Sheridan, Department of Geography, Kent State University, Ohio, USA
- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal publishes original research papers, review articles and short communications on studies examining the interactions between living organisms and factors of the natural and artificial atmospheric environment.

Living organisms extend from single cell organisms, to plants and animals, including humans. The atmospheric environment includes climate and weather, electromagnetic radiation, and chemical and biological pollutants. The journal embraces basic and applied research and practical aspects such as living conditions, agriculture, forestry, and health.

The journal is published for the International Society of Biometeorology, and most membership categories include a subscription to the Journal.

Impact Factor: 2.577 (2017), Journal Citation Reports®
