Monographs in Mathematics

Series Editors: H. Amann, J.-P. Bourguignon, W.Y.C. Chen

The foundations of this outstanding book series were laid in 1944. Until the end of the 1970s, a total of 77 volumes appeared, including works of such distinguished mathematicians as Carathéodory, Nevanlinna and Shafarevich, to name a few. The series came to its name and present appearance in the 1980s. In keeping its well-established tradition, only monographs of excellent quality are published in this collection. Comprehensive, in-depth treatments of areas of current interest are presented to a readership ranging from graduate students to professional mathematicians. Concrete examples and applications both within and beyond the immediate domain of mathematics illustrate the import and consequences of the theory under discussion.

Recently published:

H. Triebel

Theory of Function Spaces IV

Vol. 107

J. Behrndt, S. Hassi, H. de Snoo

Boundary Value Problems, Weyl Functions, and Differential Operators

Vol. 108

H. Amann

Linear and Quasilinear Parabolic Problems

Volume II: Function Spaces, Vol. 106

Upcoming Volumes:

M. Nagasawa

Markov Processes and Quantum Theory

Vol. 109
