## Progress in Nonlinear Differential Equations and Their Applications

Series Ed.: H. Brezis

The *Progress in Nonlinear Differential Equations and Their Applications* series lies at the interface of pure and applied mathematics. Many differential equations are motivated by problems arising in diversified fields such as mechanics, physics, differential geometry, engineering, control theory, biology, and economics. The series is open to both theoretical and applied aspects, hopefully stimulating a fruitful interaction between the two sides, and publishes monographs, polished notes arising from lectures and seminars, graduate level texts, and proceedings of focused and refereed conferences.

All manuscripts are peer-reviewed to meet the highest standards of scientific literature. Interested authors may submit proposals by email to the series editors or to the relevant Birkhäuser editor listed under "Contacts."

Series Editor:

Haim Brezis, Rutgers University, New Brunswick, NJ, USA; Technion, Haifa, Israel; Université Pierre et Marie Curie, Paris, France

Editorial Board:

Antonio Ambrosetti, Scuola Internazionale Superiore di Studi Avanzati, Trieste, Italy

Luigi Ambrosio, Scuola Normale Superiore, Pisa, Italy

Henri Berestycki, École des Hautes Études en Sciences Sociales, Paris, France

Luis Caffarelli, The University of Texas at Austin, TX, USA

Sun-Yung Alice Chang, Princeton University, NJ, USA

Jean-Michel Coron, Université Pierre et Marie Curie, Paris, France

Manuel Del Pino, University of Bath, UK

Lawrence C.
