Trends in Mathematics

Trends in Mathematics is a series devoted to the publication of volumes arising from conferences and lecture series focusing on a particular topic from any area of mathematics. Its aim is to make current developments available to the community as rapidly as possible without compromise to quality and to archive these for reference.

Proposals for volumes can be submitted using the Online Book Project Submission Form at our website www.birkhauser-science.com.

Material submitted for publication must be screened and prepared as follows:

All contributions should undergo a reviewing process similar to that carried out by journals and be checked for correct use of language which, as a rule, is English. Articles without proofs, or which do not contain any significantly new results, should be rejected. High quality survey papers, however, are welcome.

We expect the organizers to deliver manuscripts in a form that is essentially ready for direct reproduction. Any version of TEX is acceptable, but the entire collection of files must be in one particular dialect of TEX and unified according to simple instructions available from Birkhäuser.

Furthermore, in order to guarantee the timely appearance of the proceedings it is essential that the final version of the entire material be submitted no later than one year after the conference.

Recently published:

K. Alladi, B.C. Berndt, P. Paule, J. Sellers, A.J. Yee (Eds.)

George E. Andrews 80 Years of Combinatory Analysis

A. Georgievich Kusraev, Z. Dmitrievna Totieva (Eds.)

Operator Theory and Differential Equations

D. Seck, K. Kangni, P. Nang, M. Salomon Sambou (Eds.)

Nonlinear Analysis, Geometry and Applications

Proceedings of the First NLAGA-BIRS Symposium, Dakar, Senegal, June 24–28, 2019

Upcoming Volumes:

J. Fernández de Bobadilla, T. Laszlo, A. Stipsicz (Eds.)

Singularities and Their Interaction with Geometry and Low Dimensional Topology

In Honor of András Némethi
