## Springer Series on Chemical Sensors and Biosensors

Methods and Applications

Series Ed.: G. Urban

Chemical sensors and biosensors are becoming more and more indispensable tools in life science, medicine, chemistry and biotechnology. The series covers exciting sensor-related aspects of chemistry, biochemistry, thin film and interface techniques, physics, including opto-electronics, measurement sciences and signal processing. The single volumes of the series focus on selected topics and will be edited by selected volume editors. The *Springer Series on Chemical Sensors and Biosensors* aims to publish state-of-the-art articles that can serve as invaluable tools for both practitioners and researchers active in this highly interdisciplinary field. The carefully edited collection of papers in each volume will give continuous inspiration for new research and will point to existing new trends and brand new applications.

### Recently published:

R. Baronas, F. Ivanauskas, J. Kulys

**Mathematical Modeling of Biosensors**

Vol. 9

C. Kranz (Ed.)

**Carbon-Based Nanosensor Technology**

Vol. 17

M.J. Schöning, A. Poghossian (Eds.)

**Label-Free Biosensing**

Advanced Materials, Devices and Applications, Vol. 16
