## Demographic Research Monographs

A Series of the Max Planck Institute for Demographic Research

Series Ed.: M. Myrskylä

Now accepted for Scopus! Content available on the Scopus site in summer 2021.

The Springer series Demographic Research Monographs publishes refereed monographs and edited volumes under the editorial supervision of the Max Planck Institute for Demographic Research. The scope of the series spans the entire field of demography, with a view to significantly advance research. Key research topics include population health, fertility, migration and aging. The series also places special emphasis on digital and computational demography, mathematical demography, historical demography, labor demography, lifespan inequalities, and biodemography, including research with ties to computer science, epidemiology, genetics, evolutionary biology and paleodemography. Each volume has a link to research conducted at or supported by the Max Planck Institute for Demographic Research.

### Recently published:
