## **Biological Magnetic Resonance**

Series Ed.: L. Berliner

The series covers magnetic resonance, particularly nuclear magnetic resonance (iNMR), electron paramagnetic resonance (EPR), electron spin resonance (ESR) and occasionally other magnetic resonance techniques such as Mossbauer spectroscopy as well as computational methodology related to these technologies.

The purpose of the series is to provide the reader with a critical review of each individual topic rather than a simple historical compilation, with concise references to the literature.

### **Recently published:**

L. Berliner, N.L. Parinandi (Eds.)

**Measuring Oxidants and Oxidative Stress in Biological Systems**

Vol. 34

G. Hanson, L. Berliner (Eds.)

**Future Directions in Metalloprotein and Metalloenzyme Research**

Vol. 33

T. Takui, L. Berliner, G. Hanson (Eds.)

**Electron Spin Resonance (ESR) Based Quantum Computing**

Vol. 31
