## Computational Biology

Editors-in-chief: A. Dress, M. Linial, O. Troyanskaya, M. Vingron

Endorsed by the *International Society for Computational Biology*, the *Computational Biology* series publishes the very latest, high-quality research devoted to specific issues in computer-assisted analysis of biological data. The main emphasis is on current scientific developments and innovative techniques in computational biology (bioinformatics), bringing to light methods from mathematics, statistics and computer science that directly address biological problems currently under investigation.

The series offers publications that present the state-of-the-art regarding the problems in question; show computational biology/bioinformatics methods at work; and finally discuss anticipated demands regarding developments in future methodology. Titles can range from focused monographs, to undergraduate and graduate textbooks, and professional text/reference works.

### Recently published:

F.A.B. da Silva, N. Carels, M. Trindade dos Santos, F.J.P. Lopes (Eds.)

#### Networks in Systems Biology

Applications for Disease Modeling, Vol. 32

P. Liò, P. Zuliani (Eds.)

#### Automated Reasoning for Systems Biology and Medicine

Vol. 30

T. Warnow (Ed.)

#### Bioinformatics and Phylogenetics

Seminal Contributions of Bernard Moret, Vol. 29

### Upcoming Volumes:

J. Ramsden

#### Bioinformatics

An Introduction, Vol. 21
