## Developments in Mathematics

Series Editors: K. Alladi, P.H. Tiep, L. Tu

### Aims and Scope

The **Developments in Mathematics** (DEVM) book series is devoted to publishing well-written monographs within the broad spectrum of pure and applied mathematics. Ideally, each book should be self-contained and fairly comprehensive in treating a particular subject. Topics in the forefront of mathematical research that present new results and/or a unique and engaging approach with a potential relationship to other fields are most welcome. High-quality edited volumes conveying current state-of-the-art research will occasionally also be considered for publication. The DEVM series appeals to a variety of audiences including researchers, postdocs, and advanced graduate students.

### Recently published:

T.W. Haynes, S.T. Hedetniemi, M.A. Henning (Eds.)

#### Structures of Domination in Graphs

Vol. 66

S. Macias

#### Set Function T

An Account on F. B. Jones' Contributions to Topology, Vol. 67

C. Constanda, D. Doty

#### The Generalized Fourier Series Method

Bending of Elastic Plates, Vol. 65

### Upcoming Volumes:

L.W. Beineke, J. Bagga

#### Line Graphs and Line Digraphs

Vol. 68

V. Powers

#### Certificates of Positivity for Real Polynomials

Theory, Practice, and Applications, Vol. 69
