Environment & Policy

The series, *Environment & Policy*, aims to publish research that examines global and local environmental policies. It covers a variety of environmental topics ranging from biodiversity, ecology, pollution, climate change, agriculture, biodiversity, sustainability, resources, to water security. This long-standing series has published renowned authors for over a decade and it continues to be the home for environmentalists, policy experts, and related discipline experts who are genuinely interested in tackling the issues of our days.
