Fish & Fisheries Series

Series Ed.: K. Lorenzen

The volumes in the Fish & Fisheries series will cover topics ranging from the biology of individual species or groups of fishes, to broader concepts in fisheries science, conservation and management. The series is directed to professionals and researchers in fish biology, senior undergraduate and postgraduate students, and those concerned with commercial production or harvest of fishes.

Prospective authors and/or editors should consult the Publishing Editor for more details. Comments or suggestions for future volumes are welcome:
