Human-Computer Interaction Series

Editors-in-chief: D. Tan, J. Vanderdonck

The Human-Computer Interaction Series, launched in 2004, publishes books that advance the science and technology of developing systems which are effective and satisfying for people in a wide variety of contexts. Titles focus on theoretical perspectives (such as formal approaches drawn from a variety of behavioural sciences), practical approaches (such as techniques for effectively integrating user needs in system development), and social issues (such as the determinants of utility, usability and acceptability).

HCI is a multidisciplinary field and focuses on the human aspects in the development of computer technology. As technology becomes increasingly more pervasive the need to take a human-centred approach in the design and development of computer-based systems becomes ever more important.

Titles published within the Human-Computer Interaction Series are included in Thomson Reuters' Book Citation Index, The DBLP Computer Science Bibliography and The HCI Bibliography.

Recently published:

A. Resmini, S.A. Rice, B. Irizarry (Eds.)

Advances in Information Architecture

The Academics / Practitioners Roundtable 2014–2019

J.D. Oury, F.E. Ritter

Building Better Interfaces for Remote Autonomous Systems

An Introduction for Systems Engineers

T. Dingler, E. Niforatos (Eds.)

Technology-Augmented Perception and Cognition

Upcoming Volumes:

J.-F. Uhl, J. Jorge, D.S. Lopes, P.F. Campos (Eds.)

Digital Anatomy

Applications of Virtual, Mixed and Augmented Reality

N.M. Thalmann, J.J. Zhang, M. Ramanathan, D. Thalmann (Eds.)

Intelligent Scene Modeling and Human-Computer Interaction

G.A. Boy

Design for Flexibility

A Human Systems Integration Approach

M. Schmettow

New Statistics for Design Researchers

A Bayesian Workflow in Tidy R
