Higher Education Dynamics

Series Editors: P. Maassen, J. Müller

This series is intended to study adaptation processes and their outcomes in higher education at all relevant levels. In addition it wants to examine the way interactions between these levels affect adaptation processes. It aims at applying general social science concepts and theories as well as testing theories in the field of higher education research. It wants to do so in a manner that is of relevance to all those professionally involved in higher education, be it as ministers, policy-makers, politicians, institutional leaders or administrators, higher education researchers, members of the academic staff of universities and colleges, or students. It will include both mature and developing systems of higher education, covering public as well as private institutions. All volumes published in the Higher Education Dynamics series are peer reviewed.

Please contact Astrid Noordermeer at Astrid.Noordermeer@springer.com if you wish to discuss a book proposal.
