Plant Systematics and Evolution
Editors-in-Chief: M. Koch; M.A. Lysak; K. Marhold

- Dedicated to publishing original papers, reviews and special thematic issues in the broad field of plant systematics and evolution
- Coverage includes plant systematics and phylogenetics, plant genome evolution and biodiversity, plant development, bioinformatics, genomics, population genetics, and more
- Editor-in-Chiefs: Marcus Koch, Martin A. Lysak and Karol Marhold

Plant Systematics and Evolution is an international journal dedicated to publication of original papers, reviews, new methods and resources, short communications and special thematic issues on plant systematics in the broadest sense. The journal aims to bridge the specific subject areas in plant systematics and evolution, encompassing evolutionary, phylogenetic, genomic and biogeographical studies. Taxonomic emphasis is on all land plant groups including fungi and lichens.

Fields of interest: plant systematics and taxonomy, plant evolution, biodiversity, genetics, genome evolution, comparative and evolutionary genomics, genome sequencing, bioinformatics, population genetics, reproductive biology, ecology, biogeography, palaeobotany, ultrastructure, cytology, anatomy, palynology, and plant development.

Plant Systematics and Evolution publishes original articles, review articles, invited review articles, and short communications. The journal does not levy page charges and provides free color in print.
