Plant Ecophysiology

Series Editors: L.J. De Kok, M.J. Hawkesford

The Springer Series in *Plant Ecophysiology* comprises a series of volumes that deal with the impact of biotic and abiotic factors on plant functioning and physiological adaptation to the environment. The aim of the *Plant Ecophysiology* series is to review and integrate the present knowledge on the impact of the environment on plant functioning and adaptation at various levels: from the molecular, biochemical and physiological to a whole plant level. This series is of interest to scientists who like to be informed of new developments and insights in plant ecophysiology, and can be used as advanced textbooks for biology students.

Recently published:

E.A.H. Pilon-Smits, L.H.E. Winkel, Z.-Q. Lin (Eds.)

Selenium in plants

Molecular, Physiological, Ecological and Evolutionary Aspects, Vol. 11
