Progress in Theoretical Chemistry and Physics

Series Editors: J. Maruani, S. Wilson

The aim of the *Progress in Theoretical Chemistry and Physics* book series is to provide timely and in-depth coverage of selected topics and broad-ranging yet detailed analysis of contemporary theories and their applications. The series will be of primary interest to those whose research is directly concerned with the development and application of theoretical approaches in the chemical sciences. It will provide up-to-date reports on theoretical methods for the chemist, thermodynamician or spectroscopist, the atomic, molecular or cluster physicist, and the biochemist or molecular biologist who wish to employ techniques developed in theoretical, mathematical or computational chemistry in their research programmes. It is also intended to provide the graduate student with a readily accessible introduction to various branches of theoretical chemistry, physical chemistry and chemical physics.

All contributions to edited volumes, monographs and proceedings should undergo standard single blind peer-review to ensure high scientific quality by at least two experts in the field.
