Use R!

Series Editors: R. Gentleman, K. Hornik, G. Parmigiani

This series of inexpensive and focused books on R will publish shorter books aimed at practitioners. Books can discuss the use of R in a particular subject area (e.g., epidemiology, econometrics, psychometrics) or as it relates to statistical topics (e.g., missing data, longitudinal data). In most cases, books will combine LaTeX and R so that the code for figures and tables can be put on a website. Authors should assume a background as supplied by Dalgaard's *Introductory Statistics with R* or other introductory books so that each book does not repeat basic material.

Recently published:

J. Polzehl, K. Tabelow

Magnetic Resonance Brain Imaging
Modeling and Data Analysis Using R

C. Chapman, E.M. Feit

R For Marketing Research and Analytics

M. Hofert, I. Kojadinovic, M. Mächler, J. Yan

Elements of Copula Modeling with R

Upcoming Volumes:

B. Pfaff

Analysis of Integrated and Cointegrated Time Series with R
