Use R!

Series Editors: R. Gentleman, K. Hornik, G. Parmigiani

This series of inexpensive and focused books on R is aimed at practitioners. Books can discuss the use of R in a particular subject area (e.g., epidemiology, econometrics, psychometrics) or as it relates to statistical topics (e.g., missing data, longitudinal data). In most cases, books combine LaTeX and R so that the code for figures and tables can be put on a website. Authors should assume a background as supplied by Dalgaard's Introductory Statistics with R or other introductory books so that each book does not repeat basic material.

Recently published:

J.C. Westland

Audit Analytics

Data Science for the Accounting Profession

M. Milevsky

Retirement Income Recipes in R

From Ruin Probabilities to Intelligent Drawdowns

R. Genuer, J.-M. Poggi

Random Forests with R

Upcoming Volumes:

B. Pfaff

Analysis of Integrated and Cointegrated Time Series with R
