Springer Series in Synergetics

Editor-in-chief: P. Schuster

Series Editors: H.D.I. Abarbanel (et al.)

Springer Series in Synergetics

Founding Editor: H. Haken

The Springer Series in Synergetics was founded by Herman Haken in 1977. Since then, the series has evolved into a substantial reference library for the quantitative, theoretical and methodological foundations of the science of complex systems.

Through many enduring classic texts, such as Haken's *Synergetics and Information and Self-Organization*, Gardiner's *Handbook of Stochastic Methods*, Risken's *The Fokker Planck-Equation* or Haake's *Quantum Signatures of Chaos*, the series has made, and continues to make, important contributions to shaping the foundations of the field.

The series publishes monographs and graduate-level textbooks of broad and general interest, with a pronounced emphasis on the physico-mathematical approach.

Recently published:

F. Haake, S. Gnutzmann, M. Kuś

Quantum Signatures of Chaos

J.-J. Xu

Interfacial Wave Theory of Pattern Formation in Solidification

Dendrites, Fingers, Cells and Free Boundaries

J.C. Vallejo, M.A.F. Sanjuan

Predictability of Chaotic Dynamics

A Finite-time Lyapunov Exponents Approach

Upcoming Volumes:

J.C. Vallejo, M.A.F. Sanjuán

Predictability of Chaotic Dynamics

A Finite-time Lyapunov Exponents Approach

T. Frank

Determinism and Self-Organization of Human Perception and Performance
