## Problem Books in Mathematics

Series Ed.: P. Winkler

Books in this series are devoted exclusively to problems - challenging, difficult, but accessible problems. They are intended to help at all levels - in college, in graduate school, and in the profession. Arthur Engels "Problem-Solving Strategies" is good for elementary students and Richard Guys "Unsolved Problems in Number Theory" is the classical advanced prototype. The series also features a number of successful titles that prepare students for problem-solving competitions.

### Recently published:

P. Pollack, A. Singha Roy

#### Steps into Analytic Number Theory

A Problem-Based Introduction

A.C.-F. Liu, G. Sichertman, T. Yoshigahara

#### The Puzzles of Nobuyuki Yoshigahara

D. Andrica, O. Bagdasar

#### Recurrent Sequences

Key Results, Applications, and Problems

### Upcoming Volumes:

A. Sintamarian, O. Furdui

#### Sharpening Mathematical Analysis Skills
