## Problem Books in Mathematics

Series Ed.: P. Winkler

Books in this series are devoted exclusively to problems - challenging, difficult, but accessible problems. They are intended to help at all levels - in college, in graduate school, and in the profession. Arthur Engels "Problem-Solving Strategies" is good for elementary students and Richard Guys "Unsolved Problems in Number Theory" is the classical advanced prototype. The series also features a number of successful titles that prepare students for problem-solving competitions.

### Recently published:

A. Caminha Muniz Neto

#### An Excursion through Elementary Mathematics, Volume III

Discrete Mathematics and Polynomial Algebra

A. Caminha Muniz Neto

#### An Excursion through Elementary Mathematics, Volume II

Euclidean Geometry

H. Sedrakyan, N. Sedrakyan

#### The Stair-Step Approach in Mathematics

### Upcoming Volumes:

H. Sedrakyan, N. Sedrakyan

#### Algebraic Inequalities
